YouNesta

Full-Stack specialized in Front-end / Web3

Education

Bachelor in Project Management Web Development (Sup'internet / Epitech Digital) — 2017

Skills

Front-end: ReactJS / Next.js / TypeScript / JavaScript (ES6+) / HTML / CSS / Webpack / Vite / Redux / Zustand / Styled Components / Tailwind / Storybook / Cypress / React Testing Library / Jest / Framer Motion / TanStack Table / SWR / React Query / ShadCN / i18next
Back-end: NodeJS / Express / GraphQL / REST / MongoDB / PostgreSQL / MySQL / Redis / Prisma / tRPC / WebSocket / Socket.io / JWT / OAuth2
Web3: Solana / SPL Token / Metaplex / Anchor Framework / Solana Web3.js / Jupiter API / Wagmi / Phantom SDK / Wallet Adapter / IPFS
DevOps: Docker / Jenkins / Firebase / AWS / Vercel / Netlify / Nginx / Git / GitHub / GitLab / CI/CD Pipelines / PM2 / Bash scripting
Data & Analytics: ApexCharts / Grafana / DataDog / mParticle / Google Analytics / Google AdSense / Mixpanel / BigQuery / Segment
Practices: Agile / Scrum / Kanban / Pair Programming / TDD / Code Review / Continuous Integration / Continuous Deployment / Clean Architecture / Design System Development

Professional Experiences

Charles.co — February 2026 (Current)

Senior Full-Stack Engineer – Telehealth Platform

Charles.co is a French telehealth platform (online consultations, pharmacy, patient follow-up) and Cercle its patient coaching product. Full-stack engineer across 7 repositories: patient front-end, OMS back-office, Cercle mobile app, Cercle Core and onboarding. Built an MCP server on the OMS exposing 7 patient tools (consultations, prescriptions, bills, deliveries) to the Intercom Fin AI agent, secured with JWT patient auth, a kill switch and Datadog logging. Shipped the consultation and messaging flow: closing modal, regulatory call tracking, "no call needed" options, messaging page, feature-flagged rollouts. Developed pharmacy funnel and patient space features: Body Reset program, Withings smart scale section, outro A/B test. Delivered Cercle mobile app features (Expo / React Native): weekly-protocol reminders, progress charts, PostHog tracking, Android SDK and build upgrades. Extended Cercle Core coach tooling on Stream Chat: broadcast messaging, search, patient notes, check-in tools, and hardened coach-scoped access to patient data. Re-architected PostHog and Datadog into agnostic, feature-based modules; improved CI, Dependabot and E2E setup.
Tech: React / React Native / Expo / TypeScript / Vite / Zustand / Ruby on Rails / PostgreSQL / RSpec / MCP / Intercom Fin / Stream Chat / PostHog / Datadog

Ynexis / Yakeey — 2025

Tech Lead – Real Estate Estimation Platform

Ynexis develops advanced real estate estimation tools for real estate agents and professionals. Responsible for the architecture, development, and integration of AI-based estimation models. Created internal tools for model performance measurement and maintained the sales and purchase platform. Implemented a design system ensuring brand consistency across all interfaces.
Tech: React / Next.js / React Testing Library / Vite / ApexCharts / Rechart / MUI / Redux / TypeScript / Storybook / Cypress / Zustand / Tailwind / Jest / SWC

The Fountain — July to December 2024

Front-end Engineer – Community Game Platform (Web3)

The Fountain is a Web3 tool enabling memecoin communities to create token-based games. Designed and developed the front-end architecture, integrated Solana wallets, and implemented randomized reward mechanisms connected to SPL token treasuries.
Tech: React / Solana / Vite / React Testing Library / Redux Toolkit / Wagmi / TanStack Query / Zustand / Phantom SDK / SPL Token JS / Tailwind / Jest

Bridge USDC Cosmos ↔ **Arbitrum** — 2024 (Side Project)

Full-Stack Developer – Cross-chain Bridge

Personal project bridging USDC across Cosmos and Arbitrum ecosystems. Designed the bridge UI, managed blockchain interactions, and handled RPC/indexer integrations for real-time validation.
Tech: React / TypeScript / Wagmi / Ethers.js / Vite / GraphQL / Cosmos SDK / Arbitrum SDK / Tailwind / Zustand / Jest

Jupiter Perps Dashboard — 2025 (Side Project)

Developer – Performance Tracking Tool (Solana)

Personal dashboard for analyzing trading performance on Jupiter Perpetuals (Solana). Built data aggregation modules and visualization dashboards for ROI and trade efficiency analysis.
Tech: React / Solana / Jupiter API / Vite / ApexCharts / Zustand / Tailwind / React Testing Library / Jest

Top Music — April 2023 – May 2024

Lead React Developer

TopMusic is a Christian music streaming platform offering a tipping system for artists. Defined front-end architecture, built streaming interfaces, integrated tracking and payments, and led front-end delivery.
Tech: React / Next.js / Styled Components / Jest / React Testing Library / Redux / TypeScript / Storybook / Mangopay / Git / Vercel

VEEPEE — October 2022 – February 2023

React Developer

Veepee is a European leader in private online sales. Refactored the vacation booking flow, developed new front-end components, and improved development standards in collaboration with product teams.
Tech: React / Next.js / Styled Components / Jest / Enzyme / React Testing Library / Redux /

TypeScript / Storybook / GitLab

DEEZER — January 2022 – October 2022

React Developer

Deezer is a global streaming service operating in over 180 countries. Implemented customer data platform integration, marketing standalones, and editorialized content systems.
Tech: React / Next.js / Styled Components / Jest / Enzyme / React Testing Library / Redux / TypeScript / Storybook / Cypress

LEBONCOIN — July 2018 – January 2022

React Developer

Leboncoin is France’s largest classified ads platform. Migrated legacy booking and reservation flows to React, developed purchase options, integrated payments and delivery APIs, and produced promotional visuals.
Tech: React / Next.js / Styled Components / Jest / Enzyme / React Testing Library / Redux / TypeScript / Storybook / Cypress
